Experience

QuotesMill Aug 2026 - Present
Freelance Full-Stack Developer *Remote*

- Built the company website end-to-end with **React.js** and **Node.js**, with 5+ reusable components, 5+ responsive pages, and user journeys designed for easy navigation and conversion.
- Built a **WhatsApp AI agent** that detects customer intent, confirms requirements, gets vendor pricing, and sends quotations in **Hindi, Hinglish and English**; negotiation redirects the customer to the vendor, and confirmation shares the vendor's bank details for payment.
- Implemented automated **follow-ups** for unresponsive customers and **payment reminders**, reducing manual chasing by vendors.

EddyTools Tech Solutions May 2026 - Aug 2026
Trainee Software Developer *Remote*

- Engineered a reusable, data-driven landing page system with **Next.js** and **TypeScript**, cutting event page turnaround from 3 hours to 30 minutes (83% faster).
- Architected 5+ modular, prop-driven templates with scalable component structure and strict CSS isolation, enabling customization and deployment across 2+ client events.
- Delivered across 10+ Agile sprints (daily Scrum, sprint planning), partnering with clients and cross-functional teammates to turn requirements into shipped features.

Education

Vellore Institute of Technology, Bhopal Expected May 2027
B.Tech in Computer Science Engineering, Specialization in Health Informatics (GPA: 8.93 / 10.00)Bhopal, Madhya Pradesh

- **Relevant Coursework:** Data Structures and Algorithms,Object-Oriented Programming with C++, Database Management Systems, Operating Systems.

Projects

Svastha-AI Medical Assistant | *Next.js, TypeScript, Express.js, Gemini API, PostgreSQL* github link

- Architected a full-stack AI medical assistant using **Next.js**, **React**, and **Node.js**/**Express**, delivering a responsive dashboard for patient report management.
- Implemented a relational database using **PostgreSQL** and **Prisma ORM**, exposing **RESTful APIs** for patient record storage, retrieval, and updates.
- Engineered a document processing pipeline using **Tesseract.js** and PDF parsing, and integrated **Cloudflare Workers AI** and the **Gemini API** for edge-based report analysis and an interactive health-data chat feature.

Open ChatApp | *React.js, Node.js, Express.js, MongoDB, Socket.IO* github link

- Developed a full-stack **MERN chat application** with **React.js, TypeScript, Node.js, Express.js, and MongoDB**, supporting authentication, user discovery, private messaging, and chat management.
- Strengthened application security with **JWT authentication** and **bcrypt password hashing**, implementing protected routes and persistent login sessions for authenticated users.
- Integrated **Socket.IO** for real-time message delivery, enabling users to exchange messages instantly without page refreshes through a responsive, component-driven chat interface.

Technical Skills

Languages: C++, JavaScript , Java + Spring Boot
Frontend: React.js, Next.js ,HTML, CSS
Backend: Node.js, Express.js, MERN Stack, RESTful APIs, JWT, bcrypt
Databases: MongoDB, PostgreSQL, MySQL, Firebase
Tools: Git, GitHub, Postman , Claude (AI-assisted development)

Leadership and Extracurricular Activities

Design Team Member, Edu4U : Created 15+ digital marketing assets for 5+ events, enhancing event branding.
Public Speaker and Team Lead : Directed 5+ teams and coordinated technical events for 100+ attendees.
